The best luxor game out of the series. If you like games like luxor, don't pass up on this gem!. Casual ball-popping game. Nothing special. Doesn't work on Windows 7 x64.. Sometime works, sometime not.. Simple casual game that plays a bit like "Bust-a-Move" or any Bubbles game, but the twist is actually pretty interesting. Not my style, but it's definitely a well-made casual game.. A classic match 3 franchise that made up a majority of my childhood, I can always recommend this entire series (minus Luxor Mahjongg). In the Luxor games you need to shoot coloured balls into a moving line of balls and match balls of the same colour. So that the line of balls don't reach your base. This just isn't as addicted as similar games like Tetris, Bejeweled, Dr Mario or Puzzle League. If you are a puzzle game addict this and need a different game the Luxor games are good, but if you occasionally play puzzle games like that just play one of the great ones.. This game is really fun! I like how there were multiple modes in the game (Which were really fun). I also like how Steam let players pay only once and how you don't need to pay for a premium edition. Other things I like is that there is a store and the new balls. With the Store, now my scorpion powerup is OP!

bought this game for my mum, judging for the time she spends on my steam account playing it I assume the game is great.. Nice casual game. :). There is nothing better than after a long hard day play with balls a little :) Controls and visuals aren't as good as in remastered hd versions but it's still ok for this type of game.. Those who love the classic game of luxor or matching up colors in order to clear out lines of moving gems will love this game. Lots of power ups that will help you gain more points and move onto more fast and exciting levels.. A classic match 3 franchise that made up a majority of my childhood, I can always reccomend this entire series (minus Luxor Mahjongg)
